Circuit Diagram

PCB LAYOUT

NO.	Technical requirement
Press force	300±40gf
Trip	0.35±0.10mm
Life	Electrical service life: ≥100,000 cycles
Appearance	No major injection defects, no major scrap
Withstand voltage	25V/1min, No breakdown, No flashover
Circuit conversion	Use the electrical inspection ≤ 8V, 0.15A, and the circuit is in normal on-off state
Weldability	Tin stained area is more than 95% of the invasion area
Degree of protection	IP68 (put in 10cm boiling water for 4 hours, take out the water stains on the surface and measure the insulation resistance is greater than 100 megohm)
Solder heat resistance	260% P5 °C function action and circuit conversion are normal, appearance quality is intactmegohm)
Contact resistance	≤100mΩ
Insulation resistance	≥100MΩ
